EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on June 16, 2005, assigned serial 10/539,127 and titled "DIAGNOSTIC METHOD FOR AN ELECTRONIC SYSTEMS UNIT".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the prior art of record and the searches of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches a method for diagnosing functional faults of an assembly of electronic systems being composed of components that produce and consume data, wherein at least one of the data configured to assume a predetermined particular value following development of a functional fault of at least one of the components of the assembly, the method comprising at least the steps classifying, during a phase of design of architecture of the assembly of systems, the particular values according to the associated type of faults, and recorded in a computer memory, connecting, during a diagnostic phase, a diagnostic tool to the assembly of electronic systems to access to the classification, suppressing the particular values corresponding to types of faults of components predefined in the classification as particular reliable, selecting date that have assumed a particular value, automatically calculating for each datum selected in the selecting a group of data configured to be responsible for the particular values

assumed by the datum, automatically establishing a list of the data contained in a intersection of the groups of data, and recording the particular values and their propagation on a memory for a tool provided for diagnosis of the assembly of electronic systems (claims 12 and 22).

c. Claims 12-23 are allowable over the prior art of record (now renumbered as 1-12).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM
